Education

MIT ADT University — Pune, MH
Bachelor of Technology, Computer Science and Engineering, CGPA 8.81 (Year 1) — *2025 – Expected 2029*

- Relevant coursework: Data Structures and Algorithms, Database Management Systems, Web Development

Experience

Software Development Intern — Dec 2026 – Feb 2027
Namaha Tech — *Pune, MH*

- Developed modern, interactive user interfaces in React.
- Built the backend for ManageMonk, an institute management software, in Go, handling data for institutes with more than 5,000 students.

Projects

Senior Safe Tech: Wearable Fall Detection and Alert System (Hardware + Firmware) — Jan 2026 – Aug 2026
ESP8266, ADXL345, SIM800C, Arduino C++ — GitHub

- Built a solo wearable for elderly and mobility-limited people who cannot call for help after a fall; it detects falls from body orientation (ADXL345 on ESP8266) and, after a 10-second cancellation window, sends an automatic SOS SMS and call through a SIM800C GSM module.
- Added a self-diagnostic boot sequence that checks every component at startup and reports faults with fixes, and resolved GSM reliability issues (power, wiring, baud rate) until alerts sent consistently.

BharatSetu: AI Bid Compliance Verification Platform — 2026
Python, OCR, NLP, Rules Engine — GitHub

- Led a team building an OCR + NLP + rules-engine pipeline (Smart India Hackathon PS 26100) that automatically flags missing or non-compliant items in GeM procurement bids, replacing slow, error-prone manual checks.
- Ranked in the top 100 of 1000+ teams (top 10%) in the MIT ADT internal SIH 2026 and received INR 10,000 university funding to continue development.

GoSolar: Rooftop Solar Subsidy Assistant — 2026
Python, FastAPI, LangGraph, React, TypeScript — GitHub | Live Demo

- Built an AI assistant that guides homeowners through rooftop-solar subsidy applications using a LangGraph supervisor and three specialist agents (grid, subsidy, policy), with feasibility checks and a human-approval gate before a simulated submission.
- Shipped a live React + TypeScript and FastAPI demo with automated tests, CI and a benchmark runner covering four official scenarios.

Skills

Languages: Python, C++, Go, JavaScript, TypeScript, SQL (fundamentals), HTML, CSS
Frameworks and Libraries: React, FastAPI, LangGraph
Core Areas: Data Structures and Algorithms, Database Management Systems, AI/ML (OCR, NLP), Rules Engines, Embedded Systems and IoT
Tools: Git, GitHub
Hardware: ESP8266 NodeMCU, Arduino, ADXL345 Accelerometer, SIM800C GSM Module

Certifications and Awards

Top 100 of 1000+ teams, Smart India Hackathon 2026 (Internal Round), MIT ADT University, 2026
Python Essentials 2, Cisco Networking Academy with MIT ADT University, April 2026
Python 3.4.3 Training Certification (score 70%), EduPyramids with IIT Bombay, November 2025
